

EDITORIAL

A. Mazzali

In 2007 V&P began publishing our Journal “Statistica & Applicazioni” that since then has been rewarded with more contributors even from foreign countries. This greater growth may be attributed to a higher esteem which must be given to the accurate work of referees and may be said it is a very hard one, because on their skill depends the quality of published papers. This list includes Professors: M. T. Alodat, G. Boari, G. Borroni, E. Brentari, M. Carpita, M. Ciffarelli, M. Costa, G. De Luca, F. Domma, M. Faliva, P. Ferrari, F. Greselin, D. Marasini, A. Mineo, G. Nicolini, R. Paroli, M. Poliscichio, A. Pollastri, P. Perri, P. Quatto, I. Santini, B.M. Zavanella, M. Zenga, A. Zini, M.G. Zoia, P. Zuccolotto, to whom go my thanks.

Some aims we set in front of us have been obtained, others more specific could be the task of next years. As this issue will complete the VII Volume of this Journal, I would offer my heartiest thanks to all the committees’ members. I owe a great debt to Professor M. Zenga who first sustained this project with valuable ideas and suggestions. I would like also to express my thanks to Dr S. Golia who has spent countless hours helping and assisting in the arrangement of each issue.

Finally I feel to express my gratitude to one who is no longer living: Dr Paolo Radaelli for the helpful contribute provided to our Journal.
